# Status Update on Big Game Migration Corridors and Techniques for Successful Reclamation

Jill Randall
Big Game Migration Coordinator
Wyoming Game and Fish Department

## Why migrate?

- Summer and Winter Range (Connectivity)
- Migration Promotes Abundance (Nutrition)

Too Old

Build up of defense compounds

Hard to digest

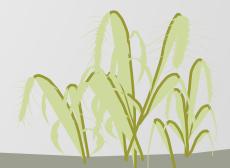

## Why migrate?

- Resident vs Migratory vs Nomadic
- Long, Medium, Short Distance Strategies in One Herd

# Why migrate?

- Fidelity to Routes
- Timing Can Vary
- Why We Still Have Migration in Wyoming

## **Components of a Corridor**

- Not all Parts of the Corridor Are Created Equal
- High-Medium-Low Use
- Stopovers and Bottlenecks

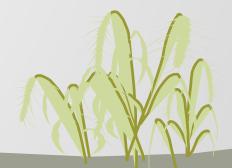

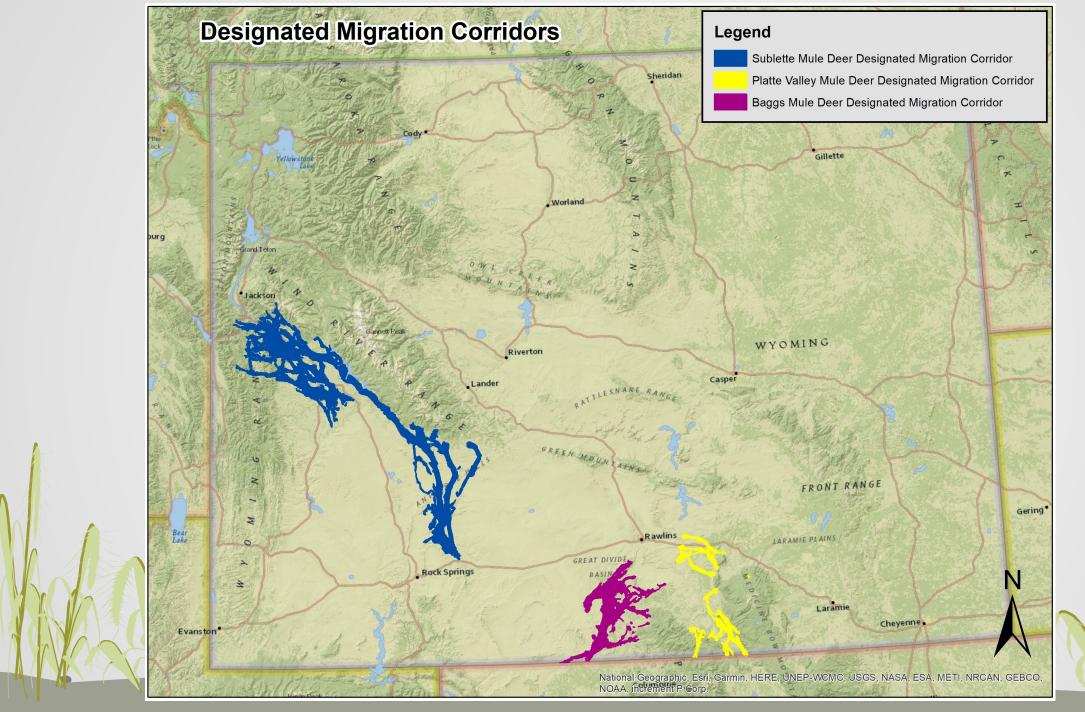

- 2016 Ungulate Migration Corridor Strategy
- 2018 DOI Secretarial Order 3362
- 2020 Governor's Wyoming Mule Deer and Antelope Migration Corridor Protection Executive Order

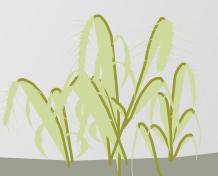

#### Why Designate or Identify a Corridor

- Identify Threats
- Prioritize Conservation
- Funding/Grants (2019-2021)
  - NFWF: \$1,753,000
  - PWF: \$596,500
  - NRCS/RCPP: \$ 11.4 million

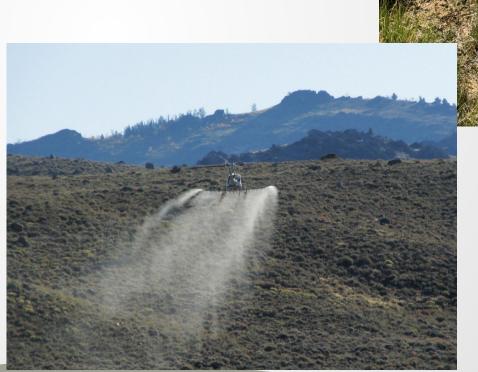

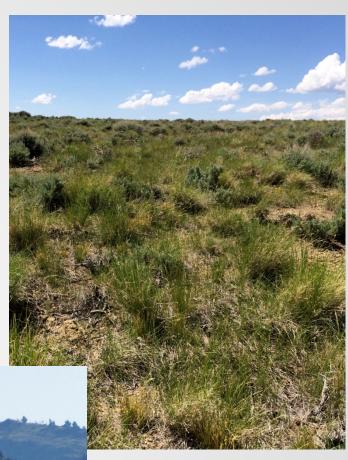

# Spring

- Early Green-up Forage
- Minimize Invasives
- Obstacle-Free Movement

## **Fawning and Stopover Areas**

- Proximity of Forage, Cover and Water
- Minimize Invasives
- Security from disturbance

#### Fall

- Mixed mountain shrubs and sagebrush
- Minimize Invasives
- Obstacle-Free Movement

#### Winter

Cheatgrass and Invasive Management

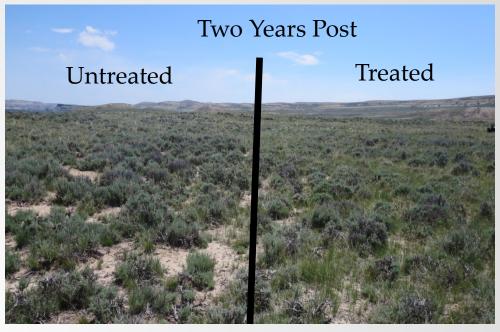

**Shrub Treatments** 

Aspen Management

Fence Modifications

Wildlife Crossings
